LabTrak Version 5.0 - Key New Features

In addition to the current features in LabTrak the following new features have been added for our new version 5.0 due for release in early 2017.

- 1) The ability to enter an unlimited amount of tests in a profile. Formerly the limit was 30.
This is very helpful to users that have a LCMS interface and are performing confirmation testing.
- 2) Enter an unlimited amount of tests in QC. Formerly the limit was 30.
This is very helpful to users that have a LCMS interface and are performing confirmation testing and wish to run QC through the LabTrak system.
- 3) Enter patient medications .
- 4) Patient Reporting will now include an Assessment Report. This report will inform you if the patient was prescribed a medication and will report that the result is consistent or inconsistent with the prescribed medication.
- 5) Reflex Testing.
- 6) QC Trending.
- 7) Custom Test Flagging—Gives you the ability to define test flags on a per test basis.
- 8) Task Log—Gives you the ability to document routine laboratory tasks such as cleaning countertops, floors, etc.
- 9) Temperature Log—Gives you the ability to track your temperature readings.
- 10) Additional reporting capabilities and the ability to export some reports to an Excel Spreadsheet.
- 11) Increased Security management.
- 12) No longer requires the use of Windows Registry.
